CEDA offers complete blind-to-blind exchanger services from cleaning, repair and inspection to preservation and storage. Using state-of-the-art extraction and cleaning technologies, we are able to provide more efficient and cost-effective exchanger solutions. Our experience and expertise ranges from on-site at our client locations to off-site at one of our owned and operated facilities.

CEDA owns and operates exchanger facilities to support the cleaning, repair and inspection of bundles during regular maintenance activities and turnarounds. We are able to manage multiple bundles concurrently, 24 hours a day, 365 days a year. In addition, we have the capacity to store and preserve exchangers for any duration, including wrapping to protect exchangers from the elements.
Exchanger Cleaning, Repair & Inspection Process

1. CLIENT ENGAGEMENT
Upon notification of required services, CEDA works with you to determine the best solution for transportation, cleaning, repair and inspection of the exchanger(s). This includes a detailed proposal outlining all activities including your requirements, and a timeline for services and costs.

2. RECEIVE FROM CLIENT/TRANSPORTATION
After acceptance of CEDA’s proposal, we will begin to execute the required scope. If the scope is to be completed on-site, CEDA will use on-site teams to begin the process. If the scope is to be completed off-site, CEDA will work with your logistics team to organize scheduling requirements including transportation to CEDA’s facility.

3. CLEAN EXCHANGER
Once the exchanger is handed over to CEDA, a complete visual inspection for acceptance will occur. During this stage, any visual deficiencies on tubes or gaskets will be identified. Cleaning of both the OD and ID will be completed at this stage using CEDA’s specialized equipment.

4. CLIENT QA/QC INSPECTION
When the cleaning of the exchanger is complete, your QA/QC team will complete an inspection for acceptance.

5. REQUIRED REPAIRS
As soon as the QA/QC inspection is done, any repairs identified will be completed. A third-party Non-Destructive Examination (NDE) company does the final inspection, which is verified by CEDA’s quality control team and your quality assurance personnel.

6. TURNOVER TO CLIENT
Upon completion, you will receive a turnover package including all pertinent information relating to the specific exchanger and components.
CEDA maintains Certificates of Authorization for Construction, Repair and Alteration of pressure vessels and piping in:

- Alberta (ABSA)
- British Columbia (TSBC)
- Saskatchewan (TSASK)

Additionally, CEDA holds the following certifications:

- National Board “R” Certification
- ASME “U” and “S” Certifications
- APEGA Permit to Practice

CEDA’s ASME Welding Procedure Library includes over 70 WPS’s for a variety of processes (SMAW, GTAW, GMAW, FCAW, SAW) and materials (ferrous and nonferrous).
CEDA’s talented and experienced team is committed to providing world-class solutions to help clients maximize production, mitigate risk and avoid costly outages, always with safety top of mind.

We operate across North America delivering more than 120 distinct services and products to support oil and gas, pipeline, power, pulp and paper, chemical, mining and steel industrial facilities. For over 45 years, CEDA has been bringing innovative technologies, equipment and processes into the field to ensure the success of our clients’ projects.

CEDA PROVIDES INTEGRATED SOLUTIONS FOR

**Commissioning & Startup**

CEDA’s pre-commissioning, commissioning and startup services for new build or facility expansion projects are multi-disciplinary, where we interface between construction and operations to verify work based on project specifications. We manage the relevant punch list across hydro-testing, cleaning, commissioning and remaining mechanical activities. CEDA is able to complete the static testing of equipment up to the issuance of ready for commissioning certificates.

**Turnarounds & Outages**

CEDA has the experience and expertise to support the supply and management of integrated turnaround and outage related services including mechanical, chemical cleaning, pressure and vacuum, fabrication, heat exchanger cleaning and repair, or any combination thereof. We support the most demanding schedules with multiple dayshift and nightshift crews in various locations.

**Operations & Maintenance**

CEDA offers a wide range of comprehensive operation and maintenance services focused on the breadth of mechanical and industrial cleaning activities. Our experience and footprint across Canada has resulted in effective strategies to address the ever-changing needs of our clients. We are capable of working on-site as well as providing maintenance and repairs to live operating units in a safe and timely manner without unplanned disruptions.

**Sustaining Projects**

CEDA is a complete service provider for sustaining project activities from off-site fabrication of piping, pressure vessels, modules, and packaged equipment to site installation, commissioning and startup. What sets CEDA apart is our ability to provide multiple mechanical and industrial cleaning services, therefore, limiting the number of subcontractors.

**Specializing in industrial maintenance, turnaround and environmental services.**
Integrated or Stand-Alone

CEDA’s service and product lines work as an integrated offering or independently.

CEDA’S CORE SERVICES & PRODUCTS

- Pressure, Vacuum & Fluid Transportation
- Chemical Cleaning
- Tank Maintenance & Cleaning
- Piggling & Decoking
- Exchanger Services
- Mechanical & Fabrication
- Manufacturing & Process Equipment
- Project Services
- Dredging & Fluid Management
